

### INTRODUCING THE ROMOTOW 7 SERIES

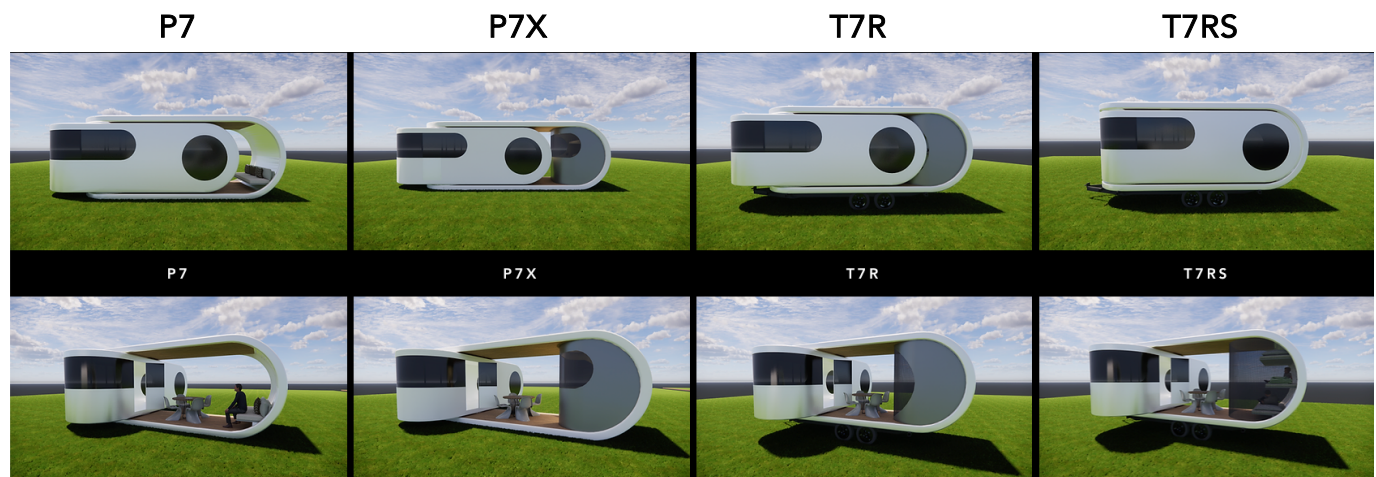

Following closely in the footsteps of its award winning, head turning (slightly) bigger brother, the Romotow T8, we have listened to our customers, and we are pleased to present a new range of Romotow caravans and tiny homes.

The Romotow 7 series carries a lower price point, yet maintains the same visual styling, interior layout and functionality of the Romotow T8. Price savings have been achieved by slightly reducing the length and width of the home, thereby reducing shipping costs and engineering demands on the structure. And with less customization available, the models are designed for mass production, so we have aligned ourselves with manufacturing partners to enable us to build at scale, pass on the savings and reduce lead times.

We are offering the 7 series as a caravan or, for those who prefer, we can remove the axles and drawbar to offer further savings as a permanent tiny home. The setup operation can be provided as a manual rotation only, or fully automated with rotation and linear sliding for optimized towing.

### ROMOTOW 7 SERIES – MODEL DESCRIPTIONS

All models incorporate the same cabin, the variations come in the size of the covered deck, towing ability and setup operation.

P for permanent, this Tiny Home is our entry level offering without wheels

An extended version of the P7 which includes a permanent triple bunkroom incorporated into the deck

T for towing, and available with manual or automated rotation of the cabin for setup.

Fully automated and optimized for towing, the T7RS has the smallest towing length and best weight distribution

GENERAL DETAILS	P7	P7X	T7R	T7RS
